EXPERIENCE

Careator Technologies (April 2021 – Till Date)

- **EMPLOYEE MANAGEMENT**

TECHNOLOGIES: ANGULAR, KENDO UI, NEST JS, GRAPHQL, POSTGRAPHILE, MICROSERVICES, BULL JS, DOCKER, SOCKET CLUSTER.
In this project, built a web application for managing the employee details like create, delete, update and listing all the existing employees in a table format. Given a feature like uploading bulk employees details in excel. Notifying the user with notification on CRUD activity. Also Dockerized the whole application using Docker Desktop.

- **EMPLOYEE ONBOARDING**

TECHNOLOGIES: REACT.JS, ANT-DESIGN, NEST.JS, MYSQL, OPEN-API.
In this project, we are building an application for HR to on-board the employees who have been selected after interviews and to manage the internal employees of the organisation who will be involving in the recruitment process of the employees. This application involves workflow starting from candidate(employee) creation, document upload by candidate till the final offer letter is released to the candidate. I worked on Front end components and back-end APIs for the application.
